Lab 1

## Introduction to Vue.js

### Lab: Vue video lessons - Task 1 of Coursework – being marked.

I have provided the starting files you need on Moodle for this week. Then go to:  
<https://www.vuemastery.com/courses/intro-to-vue-3/intro-to-vue3>

In the labs **using headphones and in your own time** work through lessons 1-4.  
This first one is just an intro, the work starts in task 2.  
Don't just rush through these, make sure you understand what is being said. There are no prizes for doing this quickly!

I will assume you have done all 4 lessons when we move on next week. Stay up to date.

If you want any feedback or help, ask me in the labs or you can Teams me or email me.

### 6 points in total available for this week.

All tasks finished and code working, comment your code as you go.

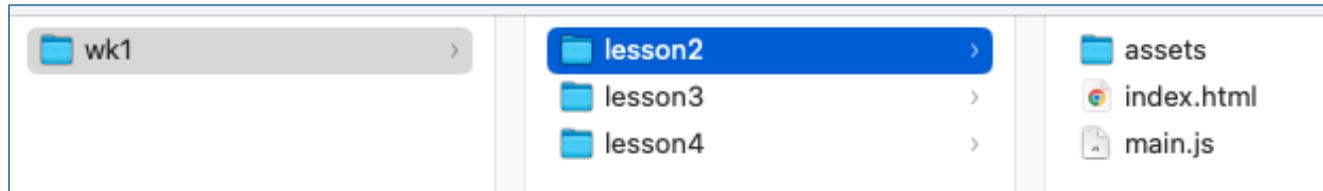

Annotated screenshots of the browser output for each task added to a logbook pdf  
Use the annotations to **explain briefly** what is happening and what you have understood.

You need to add 1 screenshot, cropped and resized, for tasks 2, 3 and 4. So that's 3 screen shots in all plus some annotations.

Make sure there is something in the screenshots to identify you, your name or id, see slides 48 and 50 to clarify this.

When it finally comes to submission time you will have a folder called week 1 containing 3 folders lesson 2, 3 and 4 which will contain your code. This will form part of the final upload zip

I will go over this again don't worry, but something like this.

If you don't understand something ask us.
